Summary

A dedicated and detail-oriented Frontend Developer with 2+ years of professional experience at PT Digital Amore Kriyanesia, specializing in the development and maintenance of enterprise-grade web applications. Experienced in delivering end-to-end solutions across frontend and backend using Laravel (PHP) and Java Spring Boot. Contributed to multiple banking sector projects, including leading the development of a reconciliation system currently used by an internal banking team, as well as implementing new features and UI enhancements for a Virtual Account application. Adept at working within professional constraints while delivering reliable and scalable solutions. Seeking to bring proven fullstack expertise to a forward-thinking engineering team.

Education

SMK ASSALAAM BANDUNG	High School Diploma / Vocational Certificate
Software Engineering	Bandung, West Java • 2021 - 2024

Experience

PT. Digital Amore Kriyanesia	Bandung, West Java
Frontend Developer	August 2024 – Present
- Developed and maintained frontend interfaces for enterprise-level banking applications across multiple BPD (Regional Development Bank) projects. - Built a reconciliation web application for an internal banking team using Bootstrap, jQuery, and Laravel, capable of processing 10,000+ to 1,000,000+ of records per reconciliation cycle, currently actively used in production. - Developed a high-volume file import feature supporting 10,000+ to 1,000,000+ of data entries per batch, ensuring reliable data handling at scale. - Delivered 2 breaking-change features on a Virtual Account application while ensuring zero production issues, alongside performing UI improvements and ongoing maintenance. - Developed and maintained an inter-campus organization website using Vue.js and Laravel, serving 50+ registered universities across Indonesia, handling both feature development and ongoing updates. - Collaborated closely with backend engineers on Java Spring Boot services, gaining working knowledge of API integration and backend logic.	

PTIPD UIN Sunan Gunung Djati Bandung	Bandung, West Java
Backend Developer Intern	September 2023 – November 2023
- Developed backend system for computer laboratory management at PTIPD UIN Sunan Gunung Djati. - Built RESTful APIs using Express.js integrated with MySQL database to support frontend system operations.
